BMX BIKES ON RAMPS

American Ramp Company Pro Series ramps are designed for the use and abuse from BMX style bikes. Below you will see pictures of bikes (and yes even a unicycle) being ridden on our ramps. Listed below are some of our specifications on why exactly we allow bikes to be ridden on these ramps without affecting the warranty.

- **Framework**
10-gauge galvanized laser-cut, CNC-formed metal framework
Meets ASTM specification A568/A1011
Powdercoat paint finish
Proprietary ARC specification
- **Riding Surface**
7-gauge galvanized metal riding surface
Meets ASTM specification A568/A1011
MaxGrip powdercoat paint finish
Proprietary ARC specification
- **Support**
7-gauge galvanized laser-cut metal support rib
Meets ASTM specification A568/A1011
MaxGrip powdercoat paint finish
Proprietary ARC specification
- **Enclosures**
13-gauge galvanized laser-cut metal enclosure
Meets ASTM specification A568/A1011
Powdercoat paint finish
Proprietary ARC specification
- **Coping**
2 3/8" O.D. Schedule 40 pipe coping
Meets ASTM specification A500 GRB
Hot-dipped galvanized finish
Meets ASTM specification A123
- **Platform Guards**
Vertical-baluster platform guards
Meets ASTM specification A568/A1011 for sheet metal components
Meets ASTM specification A500 GRB for tubing and pipe components
Hot-dipped galvanized finish
Meets ASTM specification A123
